

Air Source Heat Pump Rebates Up to \$500

Rebates are available to Klickitat PUD customers who want to add or replace a qualifying heat pump in their residence. The rebate is for existing residences that are primarily heated by an electrical source.

Call or come by the Goldendale office, and our Energy Services specialist will answer your questions about heat pumps and furnish you with a heat pump buyer's guide and the rebate paperwork.

To make this affordable, Klickitat PUD will lend qualifying customers the money to install the heat pump at 4.9 percent APR fixed interest, with the choice of a one- to seven-year payback time. After the installation passes inspection, the rebate amount is taken off the original loan amount and the remainder is put on the customer's electric bill.

Our residential weatherization program assists homeowners in retrofitting their homes to make them more energy efficient. Site-built or permanently installed mobile homes that are primarily heated by an electrical source and are existing residences qualify for this program. Weatherization includes installing or adding insulation, replacing any single-pane window or double-pane aluminum windows with Energy Star®-rated windows and sealing the ductwork in your home. Loans are also available for these installations.

Become one of the more than 500 customers who have taken advantage of this energy-saving program by calling (509) 773-7622 or (800) 548-8357 for details.

If you elect to use a contractor for your project, they must be on our authorized contractors list to meet program requirements. Call one of these contractors today for a free estimate!
